INTISARI

Electronic commerce adalah salah satu bagian yang paling terpenting dari internet akhir-akhir. Saat ini dengan semakin pesatnya perkembangan teknologi dan internet di indonesia, telah memiliki dampak yang besar terhadap perubahan bisnis, yaitu mulai dari cara beriklan, cara jual beli, cara berinteraksi antar manusia, dan sebagainya. Dengan ecommerce telah banyak merubah dalam proses jual-beli. Jika dalam suatu jual-beli penjual dan pembeli bertemu, namun jika dengan ecommerce mereka tidak perlu bertemu.

Penelitian ini berfokus pada kebutuhan identifikasi bisnis dan desain sistem e-commerce yang sesuai dengan bisnis ini. Penelitian yang dilakukan oleh sebuah studi kasus pada JN'Fashion Store. Hasil penelitian menunjukkan bahwa dengan mengidentifikasi kebutuhan bisnis, media website dapat menyediakan fitur fungsional kunci dan informasi real time yang memenuhi kepuasan pelanggan. Fitur-fitur ini meliputi produk pencarian, ketertiban dan informasi rekening, pengiriman dan konfirmasi pembayaran dan sehingga memberikan integrasi dari persediaan seluruh unit penjualan . Bahasa pemrogramannya adalah PHP dan HTML. Database nya menggunakan MySQL. Tools dan Editor yang digunakan ialah XAMPP untuk Windows, Sublime Text, Google Chrome.

Faktor yang tidak kalah penting adalah kepercayaan. Dalam proses ini kepercayaanlah yang menjadi modal utama. Karena dengan kepercayaan kedua belah pihak, maka proses jual-beli e-commerce bisa terjadi dan terlaksana.

Kunci / keyword : website, e-commerce, pakaian, informasi.

ABSTRACT

Electronic commerce is one of the most important parts of the internet lately . Nowadays with the rapid development of technology and the internet in Indonesia, has had a great impact on business changes. That is starting from how to advertise, how to buy and sell, how to interact between humans, and so forth. With e-commerce has changed a lot in the process of buying and selling. If in a buyer-seller and buyers meet, but with e-commerce if they do not need to meet.

This study focuses on the needs of business identification and the design of e-commerce systems that fit this business. A study conducted by a case study on the JN'Fashion Store. The results show that by identifying business needs, the media website can provide key functional features and real-time information that meet customer satisfaction. These features include product search, order and account information, delivery and payment confirmation and thus provide integration of the entire sales units of inventory. The programming language is PHP and HTML. Its uses MySQL database. Tools and editors are used XAMPP for Windows, Sublime Text, Google Chrome.

The most important factor is trust.Because with the trust of both parties, then the process of buying and selling e-commerce can happen.
