ABSTRACT

Leekofiber company is the company that produce the handicrafts which made by fiberglass. First time this company just selling their product into the reseller whose selling the handicraft and souvenir in the Prambanan temple. But now, this company not only produce the souvenir that close with a Prambanan temple, but this company also produce an other handicraft which order by their customer and also the uniquely handicraft that very beauty and of course everybody like their product and want to buy it. And now their make a souvenir shop named Leekofiber Shop.

The problem held since Leekofiber shop get more customers. The manual service make a queue in a selling process. Its make a bad services, and the information's their get it doesn't accurate and not relevant and also need a more time to get the selling report.

With that analyze, the problem is how to make the Management Information System that based computerization system which can solve their problem in a queue service and get the information's which accurate, relevant and need a less time to get the selling report
