MOTTO

“For Indeed, with hardship [will be] ease. Indeed, with hardship [will be] ease”

(Quran Surah Al-Insyirah 5-6)

“When I have Allah with me, I can overcome any pain.”

(Oktavia Ajeng Prawesti)

“Power isn’t determined by your size, but the size of your heart and dreams!”

(Monkey D. Luffy)

DEDICATION

All Praise be to Allah S.W.T, the Most Gracious and Most Merciful, who always gives pleasure to His servants so that I cannot stop giving thanks to Him.

With the blessing of Allah S.W.T, this thesis is dedicated to my beloved mother and father. My two older brothers who always support and pray for me. Friends who are always there and always support. As well as supervisors and friends from class 19 BCIS 01 who always give good advice and directions.

ACKNOWLEDGEMENTS

Assalamualaikum Warahmatullahi Wabarakatuh

All praise be to Allah SWT, who with His majesty has given His Grace, guidance, knowledge, and abundant fortune to all of us. Sholawat and greetings are also delivered to the prophet Muhammad SAW who has brought human life from the age of ignorance to this bright era. By saying Alhamdulillah rabbi'l'alam, the thesis entitled "Website-Based LPK Bina Asih Magelang Administration Payment Application Design" can be completed properly.

This thesis is written to fulfill one of the requirements to obtain a Bachelor's degree and as a form of applying the knowledge gained at Amikom University Yogyakarta. In its writing, there are still many shortcomings and therefore criticisms and suggestions are expected to make it even better. In addition, this thesis is also expected to be useful for further research.

The writing of this thesis could not have been completed easily without the help and prayers from several parties. Therefore, sincere gratitude is expressed to:

1. Mr. Prof. Dr. M. Suyanto, M.M. as the Rector of Amikom Yogyakarta University.
2. Mr. Hanif Al Fatta, S.Kom, M.Kom, the Dean of the Faculty of Computer Science, Amikom Yogyakarta University.
3. Mr. Anggit Dwi Hartanto, M.Kom as the Thesis Advisor who with his kindness and patience provided a lot of guidance that greatly helped in the completion of this thesis.
4. All lecturers of Universitas Amikom Yogyakarta, who have shared knowledge and insights in the writing of this thesis.
5. My family, especially my mother who has always been there to support and pray for me.
6. All of my friends who have been kind enough to accompany and encourage me throughout this journey.

ABSTRACT

Web-based payment application is a technology that has begun to be widely developed at this time because in addition to having many enthusiasts, it also provides convenience and many benefits for its users. This study aims to design a web-based payment application to support business processes at LPK Bina Asih Magelang.

At this time, LPK Bina Asih in its transactions can be said to be still not effective. In addition, there is no data collection on the financial statements. Therefore, the existence of this payment application is expected to help labor enthusiasts to get convenience in the payment transaction process and assist LPK owners in the process of their financial statements.

This web-based payment application can be useful to compete in an increasingly modern era like today. This application is also expected to be able to provide benefits for LPK Bina Asih Magelang as a support in the business process and can be another alternative in the transaction process.

Keyword: Payment Website, Waterfall Method, Interface Design.
