## ABSTRACT

Freight forwarding services for the distribution of goods and documents as a vital process in the development of the digital economy. Many shipping agents provide solutions for the distribution of goods or documents. The distribution process must be done quickly, precisely, safely, reliably, and safely. The fastest process of a land and sea expedition agent is the fastest time needed once twenty-four hours or one day. That is because all items to be sent must stop at the existing post to be distributed again.

This point of weakness provides an opportunity to bypass the process and get goods to their destinations faster by courier dealing directly with the sender through an agreement agreed on the Kirim-in.com feature. Couriers registered at Kirim-in.com that carry out the distribution of goods or documents through the air, land, sea.. Kirim-in.com provides courier and sender features by displaying basic data such as delivery date, product quantity, product photos.

The website kirim-in.com becomes the main solution in the distribution of goods and documents in a shorter time because of the existing couriers and transit shipments. Kirim-in.com is a medium to connect the couriers and senders who ask for permission in the delivery of goods or documents. Kirim-in.com try opening jobs and drove society improvement through the features as a courier.
