CHAPTER 5

CONCLUSION AND SUGGESTIONS

5.1   Conclusion

Based on the research and discussion that has been described, the following conclusions are taken :

1. Author has succeeded in add new features in Mobile Application.

2. The mobile application runs in accordance with the features that have been made in the application, the application can manage all project design activities until the project creation..

3. Users can view the report of each project on the application so that each project will be well controlled.

4. By using this application, people no longer need to access the system on the web manually, thus facilitating the process of making projects with a short duration of work.

5. The system used is mobile based, so the system can be used anywhere.

6. The mobile application can improve the accessibly to Teras Code Digital.

5.2 Suggestion

Based on the conclusions previously outlined, the research appears in the proposed some suggestions for further research, namely:

1. Further improve the effectiveness of the api to be accessible on the features of all the features on Mobile Applications.

2. Prevent data errors in the system so that future projects can be done well and on time.

3. The addition of other features that can help users and developers in making project.

4. Addition or replacement of the application features to enhance the performance of the system.

5. In the future the user interface will be further developed so as to avoid any bugs in the project
