DEDICATION

Praise my gratitude to Allah SWT for giving His blessings, mercy and guidance so that I can complete this Thesis well. I also feel grateful to the people around me who have directly or indirectly assisted me in working on this thesis. I present this thesis:

1. My father, Kasirin, my mother, Rubini Afiano, my brother, Fazri Farhandi Afiano, Rafa Algifano who always prayed, encouragement, and support to me.
2. Mr. Amir Fatah Sofyan, S.T., M. Kom. As a supervising lecturer who always give input and guidance in completing the thesis.
3. Myself and I am very proud of myself because I was able to finish this description.
4. My dear friends and contrums.
5. 15 BCI-01 classmate, who has been my friend during college.
6. And all the parties who have helped and supported me that I could not mention one by one.

ACKNOWLEDGEMENTS

Praise our gratitude to Allah SWT for his blessings and gifts so that the authors can complete the thesis report in time with the title "Designing and Creating an Android-based GYM tutorial Application". Android-based "This thesis was prepared to complete the final coursework and qualify for the graduation of S1 Informatics program at Amikom University Yogyakarta. During the education of Strata 1 informatics until the completion of the thesis process, various parties have provided facility, assisting, nurturing, and guiding writers for that especially to:

1. Mr. Prof. Dr. M. Suyanto, MM as rector of Universitas Amikom Yogyakarta that has been providing ease in completing the education.
2. Mr. Bernadhed, M. Kom. As a supervising lecturer who has spent much time and effort to guide the authors during the preparation of this thesis.
3. Mr/Mrs Lecturer at Universitas Amikom Yogyakarta who has equip writers with some useful disciplines.
4. Friends-The struggle of Students S1 Informatics 2015, which has been discussing and collaborating with the authors during the education period.

The author realizes, this thesis is still a lot of weaknesses and shortcomings. Therefore, the criticism and suggestions that constructive will be welcomed, hopefully the existence of this thesis can be useful and add to our insight, especially about the design of interactive Media applications.

ABSTRACT

The development of technology today is very fast in line with the development of globalization world. People's knowledge of the importance of sports during time to maintain health is crucial. Gym is a solution for people who have little time and the sport room is running low in the big city. So it is demanding that people follow the Gym but not accompanied by an overnight supervisor.

Gym activities without being supervised by experienced trainers can have a bad impact if they are not serious about follow-up, such as mild injuries to severe injury caused by technical errors during the Gym.

Technological developments simplify people who are not in the damping by trainers can do the Gym without any serious mistakes because it is assisted by applications that will display videos that are capable of simulating the correct techniques, the purpose of Development of this application in order to minimize the risk of injury that happens to the beginners of the Gym. With the construction of the tutorial for beginner Gym application is expected that the Gym beginners can use the application in hopes of helping the customers.
