

CHAPTER V

CLOSING

5.1 Conclusion

From the results of the research that has been done, several conclusions can be drawn, namely:

1. The process of making this video through several stages including data collection, analyzing problems from the data, designing ideas and concepts, carrying out the production process, and evaluating.
2. From the test results evaluated by 20 respondents, the score obtained for information aspect of the video was 84.3% which can be categorized as Very Good.
3. From the test results evaluated by 20 respondents, the score obtained for visual aspect of the video was 83.1% which can be categorized as Very Good.

5.2 Suggestion

This research still has many shortcomings and mistakes both intentional and unintentional which might be developed better in terms of deeper analysis and products that are more detailed and accurate for the products produced. The following are suggestions that can be applied to further research.

1. The quality of animated video motion graphics.
2. For the development of further research it is recommended to focus more on design and information.
