CHAPTER V

CLOSING

5.1 Conclusion

Based on the things that have been discussed in previous chapters on "Analysis and Design of Information Systems Room Reservations Website based on Selekta Hotel Yogyakarta", the author can draw several conclusions follow:

1. Preparation of Information Systems at the Hotel Selekta can be done by analyzing the strengths and weaknesses of the system currently being used.

2. Selekta Hotel Information Systems development can be performed using the programming language PHP, HTML and CSS. '

3. With this website, Hotel Selekta can expand your marketing reach and prospective guests can get information about Hotel Selekta without having to come to the site

4. Prospective guests can use the Email Gateway and checking empty room to launch the process of booking rooms. Feature Tourism Spots and Local Delicacies can also be an incentive for guests to keep using the website Hotel Selekta.

5.2 Suggestions

In terms of development Selekta Hotel Information Systems, there are many features that can be implemented to this system in the future, among other things:

1. Payment Gateway that can be integrated in the system to facilitate financial transactions digitally.
2. The cashier system that is integrated with the accounting system to reduce the risk of error or fraud in the financial section.
3. Membership systems and discounts for frequent guests who rent a room in Hotel Selekta, which can help bring in guests who have stayed before.
