CodeIgniter

### **Honors & Awards**

#### **#1 Winner of Lomba Kompetensi Siswa (LKS) - IT Network System**

**Administration - LKS SMK - Dinas Pendidikan dan Kebudayaan Kabupaten**

Sukoharjo

Sep 2019

Lomba Kompetensi Siswa (LKS) or Student Competency Competition is an annual competition between students at the SMK level according to the area of expertise taught at participating SMKs. This LKS is equivalent to OSN (National Science Olympiad) which is held in SMA. This activity is one part of a series of selections to get the best students from all over Indonesia who will be further guided by their respective competition teams and will be included in international skill competitions.

The winner of the National LKS will represent Indonesia to the ASEAN Skills (ASEAN-level Expertise Competition), the WorldSkills Asia Competition (Asian-level Expertise Competition) and the World Skills International Competition (World-level Expertise Competition). Students who take the LKS are the best students from their provinces who have passed the selection at the district and provincial levels. This activity is to encourage the spirit of achievement of SMK students which is held every year and as an effort to promote SMK graduates to the business world/industrial world and other stakeholders.

Unfortunately, I only got 11th in the LKS at the Central Java province level.

#### **#1 Winner of Hardware & IoT - GKM (Gelar Karya Mahasiswa) Informatika 2022**

**Program Studi S1 Informatika Universitas Anikom Yogyakarta**

Mar 2022
